

Service Agreement

Amaan Application — Scope of Modules & Services

This Service Agreement (the “Agreement”) is made between Kynvera (the “Company”) and Amaan Systems (the “Client”). It forms the detailed scope-of-services schedule to the Contract Agreement between the Parties dated 1 August 2026, and sets out, module by module, the functionality comprising the Amaan Application to be delivered, hosted, and supported by the Company.

Item	Details
Service Provider	Kynvera
Client	Amaan Systems
Application	Amaan Application — operations platform
Related Agreement	Contract Agreement between the Parties, dated 1 August 2026
Effective Date	1 August 2026

Section 1 — Service Overview

The Amaan Application unifies day-to-day operations work for the Client across the following functional areas:

Area	What It Delivers
Inspections	Digital fire-system inspections with photos, signatures, multi-stage approval, and PDF/Excel reporting
HR	Staff request forms routed through HR and General Manager approval, with branded PDF/DOCX output
Service Tickets	Work orders from creation through site work, review, finance sign-off, and invoicing
Store	Materials catalog, material sets, property assignment, and Excel import/export
Operations	Overtime, timesheets, attendance, clients, trading invoices, and cheques
Finance	Contracts, costing and margin control, monthly reports, and ticket-to-contract linking
Sales (BD)	Pipeline management, follow-ups, contacts, and quotations through to invoice / LPO
DocHub	Shared document library with per-user access control
Email Automation	Scheduled recurring emails with attachments
Administration	User, employee, device, and access management, plus knowledge base

Section 2 — Application Modules: Detailed Scope

The following sets out, in detail, the functionality delivered within each module of the Amaan Application.

2.1 Fire Systems Inspections

Field inspection capture for fire alarms, sprinklers, pumps, extinguishers, emergency lighting, smoke control, and related systems, with the following capabilities:

- Photo and digital signature capture during each inspection.
- Save-as-draft and formal submission workflow.
- Multi-stage approval: Supervisor -> Operations Manager -> Business Development and Procurement (in parallel) -> General Manager.

- Full audit trail, including rejection, withdrawal, revision, and resubmission of any inspection.
- Automatic generation of inspection PDF and Excel reports.
- Civil Defense / regulatory inspection notification tracking, with email and WhatsApp reminders.

2.2 Human Resources (HR)

Digitized staff request processes covering twelve form types: Leave Application, Commencement, Duty Resumption, Contract Renewal, Performance Evaluation, Grievance / Disciplinary, Interview Assessment, Passport Release / Submission, Staff Appraisal, Station Clearance, Visa Renewal, and Asset Handover / Takeover.

- Approval chain: employee submission -> optional replacement / management sign-off -> HR Manager review -> General Manager final approval.
- Branded PDF and DOCX export of every completed form.
- In-app and email notifications at each stage of the approval chain.
- Employee leave balance tracking.

2.3 Service Tickets

End-to-end work order and complaint management, from creation through closure:

- Lifecycle: Open -> Assigned -> Site Attended -> Work Started -> Work Completed -> Verification -> GM Approval -> Finance -> Closed (with Hold and Cancel at any stage).
- Manpower and materials tracking on each ticket, with approval gating for ad-hoc material requests.
- Client sign-off, General Manager approval, and finance confirmation built into the workflow.
- Automatic generation of work order PDFs, service reports, and invoices.
- Service-level tracking with breach monitoring.
- Reporting across work orders, financials, projects, teams, and materials.

2.4 Store / Procurement

Centralized materials management used by both the Service Tickets and Operations modules:

- Fire and life-safety materials catalog across four departments: Fire Alarm, Fire Suppression, Fire Safety, and Emergency.
- Stock level tracking with low-stock alerts and a consumption ledger.
- Material sets for commonly bundled items.
- Property-level material assignment.
- Excel import and export for bulk catalog and stock management.

2.5 Operations

Day-to-day operational management covering:

- Overtime tracking with automatic cost calculation and Excel import/export.
- Client master data management used for invoicing.
- Trading invoice creation and PDF generation for material sales.
- Full cheque lifecycle: Requested -> Verified -> Prepared -> Approved -> Submitted -> Cleared, with PDF generation and notification configuration.
- Duty timesheet entry and attendance tracking, including bulk attendance import.

2.6 Finance

Commercial control over contracts and billing:

- Contract management, with Excel import.
- Monthly billing report generation in PDF and Excel.
- Costing and markup calculation with a configurable margin gate (15% default).
- Linking of service tickets to contracts for accurate billing.
- Invoice processing queue.

2.7 Sales / Business Development (BD)

Commercial pipeline management from lead to invoice:

- Pipeline stages: Prospecting -> Qualifying -> Proposal -> Negotiation -> Closing.
- Project and lead tracking, with Excel import.
- Follow-up and contact activity tracking.
- Quotation creation, submission, approval workflow, and PDF generation.
- Conversion of approved quotations into invoices, with LPO attachment.
- Sales forecasting and pipeline analytics.

2.8 DocHub

A central company document library, with upload, preview, download, and starring of documents, and per-user access grants controlled by administrators.

2.9 Email Automation

Scheduled recurring email automation (daily, weekly, monthly, quarterly, or custom interval) with attachments, including automated SLA breach scanning, daily reminders, run logs, and manual run-now capability.

2.10 Administration & Platform Management

Platform-wide administration covering user management (creation, roles, module access permissions, password resets), employee and technician records, device management, team management, and knowledge base administration, plus platform-wide dashboards and statistics.

Section 3 – General

This Agreement forms part of, and is to be read together with, the Contract Agreement between the Parties dated 1 August 2026, including without limitation its provisions on fees, payment, support, change requests, termination, and confidentiality. In the event of any conflict between this Agreement and the Contract Agreement, the Contract Agreement shall prevail.

The Amaan Application, including all modules described above, its source code, and all underlying technology, remains the sole and exclusive property of the Company at all times. The Client is granted working access to the Amaan Application for its own business use; no source code or underlying technology is transferred to the Client under this Agreement.

This Agreement is governed by the laws of the United Arab Emirates.

Signatures

IN WITNESS WHEREOF, the Parties have executed this Agreement as of the Effective Date above.
